Red Dot Design Award Winner 2014

reddot design award

Perfect synergy of Swiss precision and Italian design

Introducing Ergo-tek from Ideal-tek.

New cutters and pliers handles' set a new benchmark in ergonomics.

Following the User-Centered Design approach of one of the world's most respected research universities (University of Milan), over a two year period, Ideal-tek gained a full understanding of the needs, wants and frustrations of end users.

Subsequent painstaking attention to detail at every stage of the design process resulted in the creation of the ideal handles.

Precision Swiss manufacture provides quality, accuracy and longevity.

The addition of Italian design brings beauty and elegance.

Ergo-tek. Perfect synergy.

Handles

2-Component ESD-safe user-friendly
Ergonomic handles with a soft
comfortable gripping surface.

For every handles production lot
Ideal-Tek performs the following
tests:

- point to point resistance
- surface resistance
- decay time analysis

Material & Hardness

High quality ball bearing steel

- 45 Rockwell Hardness (HRC) for pliers
- 63 Rockwell Hardness for cutters

Pyrometer controlled inductive hardening

Superior no-scratch/antiglare satin finish

For every single production lot Ideal-Tek performs metallographic and hardness profile analysis.

Cutting Blades & Wire Definition

Cutting blades definition

Wire definition

- SOFT wire, copper, aluminium, tensile strength 250 MPa
- MEDIUM-HARD wire, stainless steel wire, material 1.4301, tensile strength 800 MPa
- HARD wire, stainless steel wire, material 1.4301, tensile strength 1800 MPa

100% visual inspection

More Features

- Dual leaf springs made of stainless steel
- Lap joint with screw, to achieve a high level of strength and precision
- Nuts made of hardened alloy steel to resist high cutting load
- Fine-pitched screw for perfect joint adjustment
- Perfect symmetry

Free Test & Maintenance

The application engineering of the Ideal-Tek factory will conduct test cutting and cutting evaluations at no charge upon the receipt of test wire samples.

We also provide free cutter model recommendations.

In order to preserve your cutters perfectly efficient keep a thin oil film on the tips head.

Head Shape & Available models

CUTTERS

- Oval
- Tapered
- Tapered & Relieved
- Wire Lead Catchers
- Special

PLIERS

- Snipe Nose
- Flat & Round Nose

TECHNICAL DATA SHEET

Oval Cutters

reddot design award

Small robust, slim shape, and optimum balance between durability and accessibility.

Large strong and durable, for intensive cutting operations.

Extra-Large very strong and durable, for intensive cutting operations.

Extra-Large Rounded extremely strong and durable with rounded head, for intensive cutting operations.

TECHNICAL DATA SHEET

Wire Lead Catcher

reddot design award

Wire Lead Catcher, made of stainless steel AISI 304, for our high precision cutters with 10mm box or 12,5mm box.

Wire Lead Catcher fits Oval, Tapered and Tapered & Relieved cutters only.

Art. No.	Type	Description
WLC100	Small	100 pcs • for cutters with box joint of 10 mm
WLC125	Large	100 pcs • for cutters with box joint of 12.5 mm

TECHNICAL DATA SHEET

Flat & Round Nose Pliers

reddot design award

A. - B. Flat nose pliers feature a very fine tip, smooth or serrated jaws and inner edges.

C. Round nose pliers have jaws formed by two cones. A round nose pliers is generally used both to clamp and to form loops on leads or wire.

A - Flat Nose
E6011-12

B - Flat Nose long
E6013-14

C - Round Nose
E6041
