S1045 Series

Dual-Receptacle Grounding Block for Workbenches

The S1045 is a space-saving grounding block designed to provide direct path to the ground in ESD Benches & Workstations for two operators/users.

Features:

- Can easily be installed/mounted at the desired location of workbench. Ideally, beneath the workstations/benches.
- A 15' long straight Green color cord with # 10 Ring Terminal, provides a connecting means to the ground.
- Users can snap-on/park their wrist strap cords on to the two 4mm studs, when not in use.
- With it's no built-in resistor construction, this product provides a direct path to the ground.
