

TECHCO MACRO ZOOM INSPECTION SCOPE

Macro Zoom Inspection Scope comes with stepless zooming ability. It has a good working distance, broader magnifying field of view and works together with 14MP HDMI CMOS camera and LED TV, thus allowing high quality images. The objective lens ranges from 0.7X to 4.5X and optional auxiliary lenses available in 0.5X, 1.5X, and 2.0X. The default camera eyepiece lens is 0.5X, well suited for any customer requirements and application. The set comes complete with a dimmable LED illuminator.

Commonly used in the electronic industry for precision parts inspection, assembly and repairs and especially useful for surface inspection of components or parts, it can also be used in biological dissection, jewellery inspection and in school laboratories.

A complete Macro Zoom Inspection Scope includes:

- one inspection scope with 0.5X eyepiece lens and 0.7X – 4.5X objective lens.
- one black working base with pole.
- one dimmable LED illuminator.
